Balancer	51		
Compressed air sprial hose	51		
Lighting systems for the assembly world	51-53		
Aluminium swivel lamps	51		

ABZ[®]

The consistent economic working place system
from A to Z

ABZ® Working place systems for technology and technical communication

The system ABZ has been completely newly developed. Due to this consistent development a further innovation push has been achieved.

The adaptation of the innovative aluminium profiles to the back converts the new ABZ system to a multipurpose system

and climbs in the league of the aluminium systems.

With the new ABZ furniture system erfi emphasizes once again its extraordinary innovative power and prominent market position in the field of technical working place systems.

The highlights of this offensive model series are of advantage in all departments of the company.

Many advantages of the revolutionary table system varantec® are now also deliverable with the new ABZ system and are decisive for the extraordinary high functionality.

ABZ® – Innovations

highlight – The innovative lighting technology – your eyes will appreciate it !

An active illumination grid guarantees non-glaring work tops, almost independently of the installation height. The light beams are regularly distributed by the active illumination grid. The anodized surface brightens the working area even more. Therefore, the inclination of the lamp is not necessary. Amongst the 8 highlight basic designs you will definitely find your optimal lamp (see page 28)

highlight – A unique technique, only offered by erfi.

erfi sensolight® - The revolution of the sensor-controlled light

Contactless switching on and off of the light sources, sensors for presence for the automatic light control and fully automatic regulation of the light volume depending on the ambient light (registered design No. 202 05 736 4) (see page 29)

erfi sensolight® - An erfi innovation.

ABZ®-lock - The keyless evolution

The security and comfort of electronic locking systems may not stop behind the door. The technology already known in the furniture system varantec has now been integrated in the ABZ system. By means of infrared or radio transmitters all erfi furniture components can be opened and closed electronically without contact. (see page 20 and 21)

ABZ-lock – An erfi innovation.

ABZ®- liftline - The solution for height adjustable work tops

Variable working height by means of clamp connections or electrohydraulic height adjustment and adjustment by a crank leave nothing to be desired. Maintenance-free due to elegant and appropriate hydraulic cylinders in the table legs, ensuring a maximum servicelife and simultaneously a maximum solidity regarding vibrations. (see page 46).

ABZ – lift – The modern height adjusting technique – exclusively from erfi !

ABZ®-Laboratory - The new model series for laboratory, development, service and testing

This model series with energy attachments, 19 inch device attachments and device cockpits offer an almost inexhaustible variety and always sufficient space for installing the erfi programme acto®, basic and highlab. The solid and welded basic design gives the necessary stability. All table legs are welded with the basic frame. (no bolted legs).

ABZ – Laboratory – A superior and representative system with excellent qualities.

ABZ®-Assembly - The new model series for manufacture and assembly

The ABZ-Assembly has the same platform as ABZ-Laboratory. Numerous system components guarantee an optimal functionality in the field of manufacture and assembly. Due to the aluminium extruded profiles adapted to the back, all advantages of an aluminium system are used.

The completely newly developed profile with its 6 grooves guarantees a perfect connection and adjustment with all imaginable system components.

ABZ - Assembly - The design of the aluminium assembly table system is convincing by many new aspects. The lateral aero-color perforated plates with a modern surface provide a pleasant freshness in the world of net product.

ABZ®-Didactic - The new model series for training and further education

ABZ-Didactic has been developed for vocational schools, technical colleges, universities, chamber of handicrafts, colleges, educational technological centres, for all technical training centres as well as for apprenticing companies.

Training islands with multi-corner attachments, electric motor-driven foldaway tables and swivelling tables for a multi-functional training as well as for the integration of the screens leave nothing to be desired already during the planning phase.

ABZ-Didactic – A system which gives freedom for developing creativity.

Working place system for laboratory, development, service and testing

ABZ-Laboratory is a model series which provides all necessary system components in the fields of electric engineering and electronics.

The device attachments and device cockpits:

1. Energy attachments and energy cockpits for installing the efficient programme of insert boards acto®
2. 19 inch device attachments and device cockpits for installing the 19 inch device system basic and highlab
3. 19 inch combine attachments and combined cockpits for installing the 19 inch device system basic and highlab as well as the programme of insert boards acto®
4. DINA4 attachments and DINA4 cockpits for installing the DINA4 files

As an alternative to the modern aluminium profile system which is adaptable to the back, all shelves and device cockpits are deliverable with an add-on table attachment.

The new ABZ® Aluminium profile system

The aluminium profile system at the back provides new functionality regarding connection and cable management.

19 inch device cockpits, shelves and other system components are flexibly adaptable and steplessly adjustable in height by their grooves.

Power and data lines can be placed elegantly and invisibly in the groove of the device cockpits. The grooves are covered by a clip profile.

For more extensive cabling, additional channels are available which, as per requirement, can be adapted directly to the ABZ aluminium profile system.

Working place system for training and further education

erfi as a leading manufacturer for all technical professions has extended its laboratory furniture system ABZ by Didactic standard system components. The new Didactic components meet all requirements in the field of training and further education.

Vocational schools and technical colleges, training centres of all kinds, chamber of handicrafts, vocational academies, training colleges, technical colleges and universities are equally equipped with the modern system components from erfi as training centres in big companies.

Working place system for manufacture and assembly

ABZ-Assembly offers an enormous variety of standardized system components in the field of assembly.

At the back the programme has a solid aluminium profile with 6 grooves. All system components for assembly can be adapted accurately.

System components such as extension arms, lamps, rails, shelves and energy supplies are only a few examples of the ABZ assembly world.

The system offers height adjustment by clamp connections, cranks and motorized drives as well as the integration of transfer systems in the table tops.

ABZ-Assembly is an absolutely vibration-free 4-leg table system which allows many configurations and extensions.

The new ABZ® System offers 10 modern and up-to-date patterns

The combination between four decorative surfaces and four colours of the frames give the system new freshness

(**) Figures for pattern 5 to 8 with pulls, alternatively with bow-type handles.

Pattern 9:

Work top: maple
Attachment: maple
Drawer unit: maple
Steel frame: white aluminium
Bow-type handle: chromium-plated
(Pulls are not recommended for this pattern)

Technical Data:

Work top not conductive

Cross section

Raw chipboard, chipboard with a thin chipboard top as per DIN EN 312 CE
Decorative side with 0,8 mm brilliant HPL, as per DIN EN 438.
Technical value as per DIN EN 312.

Chemical resistance: against organic solvents, slight acids and lye, benzene and oil, as per DIN 53799
Temperature resistance: short-term 180° C
Raw density: approx. 650 kg/m³
Edges: plastic light-gray, maple or beech

Dekor 10:

Work top: beech
Attachment: beech
Drawer unit: beech
Steel frame: white aluminium
Bow-type handle: chromium-plated
(Pulls are not recommended for this pattern)

Technische Daten:

Arbeitsplatte volumenleitfähig EGB/ESD-Ausführung

Querschnitt

Raw chipboard ESA, raw chipboard allowing electro-static discharge with a thin chipboard top as per DIN EN 61340-5 part 1 and 2 (volume conductive) Decorative side with 0,8 mm brilliant HPL, as per DIN EN 438. Technical value as per DIN EN 312.

Chemical resistance: against organic solvent, slight acids and lye, benzene and oil, as per DIN 53799
Temperature resistance: short-term 180° C
Earth connection resistance: 7,5E5 to 1E10 Ohm
Raw density: approx. 650 kg/m³
Edges: plastic light-gray

Deviations in colour of the illustrations may be due to the print

Work tables with a basic top

Table top:

30 mm thick, with a plastic edge banding all around

Frame:

profile pipe, solidly welded, optionally with welded-on or screwed-on legs.

Table height:

780 mm, other table heights deliverable on request

Option:

Reinforcement of the lower frame

Selection of pattern:

See page 10-11

The reinforcement of the lower frame is available as an option

ABZ offers the additional variant with a table top projecting by 45 mm at the front

Table top flush at the front						Table top projecting by 45 mm at the front

The keyless evolution ABZ®-lock

Infrared transmitter

Radio transmitter (transponder)

The security and comfort of electronic locking systems may not stop behind the door. Consequently, the safety locking system ABZ-lock in the digital locking and organization systems of the building technique is of almost unlimited advantage to the user. ABZ-lock is a comprehensive electronic locking system. The system is available in two variants:

ABZ®-lock – design variants

1. Electronic locking system with infrared technology. This system is mainly used for facilities for which the previous building management does not have an electronic locking system.
2. Electronic locking system with radio technology. Nowadays new buildings are already equipped with electronic locking systems. By means of ABZ-lock the entire furniture can be included in the electronic locking plan of the buildings's management.

All lockable erfi furniture system components can be equipped with the innovative ABZ-lock technique:

- Complete cabinet systems varantec pro and varantec-select
- Complete drawer unit programme

Advantages of the electronic locking system:

- Infinite locking system which allows to realize easily also complex structures
- Opening and locking by the push of a button
- Minimum administrative work due to a simple programming
- When changing the personnel or when moving, no complicated ordering of new keys but only a simple reprogramming necessary
- Loss of a key without loss of security: Immediate blocking possible. This saves consequential costs!
- Cableless due to an internal current supply, also suitable for sliding drawer units
- Audible warning signals in case of diminishing battery voltage
- Visible indication of locking and unlocking processes
- The programming is maintained even without energy supply
- Batteries which are common on the market, simple battery change
- Long service life of the batteries, 2 years for tenfold operation per day
- With radio technology: Individual transponders can be permitted or blocked resp. for individual time spans

The technology – the system

ABZ-lock comprises a few modular units: A transponder and an infrared transmitter resp. which on the push of a button activates an electronic control module which in turn releases the motorised locking mechanisms to either unlock the piece of furniture or to lock it. The electronic control module is the same for all furniture system components.

With the infrared technology there is an optical unit for the correct interaction between transmitter and receiver. At the same time the correct locking is signaled to the user in red and the correct unlocking in green. The optical unit is inserted in the front of the piece of furniture.

Different locking mechanisms are adapted to the type of locking of the piece of furniture. The locking mechanisms are coupled with the electronic control module. An intelligent technique which is a must for a new investment.

ABZ®-lock with infrared technology/programming

The programming of the individual furniture components can be made in all cases without additional hardware or software. As with normal key-operated lockings there is a difference between locking with and without main or general key-operated locking systems.

Electronic locking for individual pieces of furniture without a main or general locking system resp. (basic programming)

The lock is simply programmed with a stick and a transmitter. By inserting the stick in the electronic control module, the programming mode is activated (teach-in mode). By simply operating the transmitter the same is trained. In this way up to 100 different transmitters per lock can be programmed.

Each transmitter is unique. Several billions of different transmitters render this system untouchable. In case of the loss of a transmitter, a new transmitter can be trained very quickly. Everything can be deleted and trained again by an integrated reset button.

Locking systems for facilities with a main or general locking system (comfort programming)

With this comfortable locking an additional blue programming transmitter is supplied for the complete locking system. For the blue transmitter a conventional safety certificate is issued. In case of loss the programming transmitter can be reproduced against presentation of this safety certificate. The purpose of this programming transmitter is to put all control modules of the locking system into programming mode.

Optical unit for the infrared technology

Example of the locking mechanism

Electronic control module

If a control module is in programming mode, the individual transmitters can be trained and deleted without contact. In this way complete main and general locking systems can be programmed on site.

With this variant programming itself can easily be done from outside.

Swinging-in sliding block with M6 thread for a 17 mm groove with an affixed spring

Order No. 04.10.0007
Angular sliding block with M6 thread for a 12 mm groove

Possible wirings for power and data lines

1 = clip profile anthracite for 17 mm grooves (lateral grooves)

2 = clip profile natural aluminium for 12 mm grooves (grooves at the front and at the back)

The modern aluminium leg system profile combines an optimal functionality with a maximum of economy. 6 integrated wiring channels guarantee sufficient space for the data and power lines.

New clip profiles made of plastic and aluminium close the wiring space flexibly and thus ensure an excellent performance and are simultaneously nice to look at.

With a high number of cables additional add-on channels can be adapted simply and flexibly.

The clip profiles cover the space for the cables which are sufficient for 1-phase or 3-phase power supply lines. Data lines can also nicely be placed in the same space as the cable. For covering cable space the clip profiles are simply and flexibly pressed into the grooves.

Also the 12 mm groove at the front can be covered by a suitable clip profile made of aluminium. Therefore, the aluminium leg system profiles can also be used in clean rooms.

The lateral 17 mm grooves are covered with the clip profile made of plastic. If need be, 1 to 4 grooves can be used for the cables. This always guarantees the separation of power and data lines. At the outlet position of the cables, the clip profile is simply interrupted.

Using the clip profile technique even lines with the connector can be placed-in without having to dismount the connector. A considerable advantage of this system!

The new aluminium leg system profile in function

For straight storage boards

in connection with a system channel installed underneath

For inclinable storage boards

For 19" device cockpits

optionally with 3 or 6 HE, with a system channel installed underneath or with a steel frame

For system components for assembly halls

Extension arms, perforated sheet metal plates, swivel arms etc.

The storage board programme

The new range of storage boards can directly be adapted to the back of the aluminium leg system profile. Due to the grooves in the aluminium leg system profile, all types of storage boards can be steplessly adjusted in height.

3 models are available:

1. Storage board module for a system channel installed underneath

Material: 30 mm thick chipboard with a top of fine chipboard, coated with laminate, not conductive alternatively volume conductive of EGB/ESD design 360 mm deep

Width of table [mm]	not conductive	conductive EGB/ESD
1200	O4.11.1230	O4.11.1231
1600	O4.11.1630	O4.11.1631
1800	O4.11.1830	O4.11.1831
2000	O4.11.2030	O4.11.2031

Note: The system channel has to be ordered separately, see page 26

2. Storage board module, steplessly inclinable, with a steel frame installed underneath

Material: 30 mm thick chipboard with a top of fine chipboard, coated with laminate, not conductive alternatively volume conductive of EGB/ESD design inclusive a stopper edge at the front 360 mm deep.

Width of table [mm]	not conductive	conductive EGB/ESD

The universal ABZ® system channel, adjustable in height

Since the first presentation on the market in the year 1986 this system component has been continuously further developed and its performance has been considerably improved. This erfi innovation represents today a nearly indispensable component for all communicative and technical fields of work.

The system channel as self-supporting and independent element. Form Follows Function. A formula of success which has been optimally integrated in this element.

The channel can be equipped with the efficient 19 inch insert board programme. Innovative illumination engineering, modules such as fuse protections, sockets, small current supplies, soldering stations, compressed air supplies, various measuring devices etc. can ideally be integrated in this system. The entire system is height adjustable and thus flexibly adaptable to changes.

In connection with storage boards the system channel gets another function. The channel is a solid supporting structure.

Some system channels for general functions can be inserted in a modular table with several levels. The example shows a system channel on the lower level with short field light sockets and soldering stations and on the upper level a system channel with sockets, isolating transformer, data socket etc.

On the back of an adaptable aluminium profile further functions can be attached to the system channel such as accumulator, tool storage, perforated sheet metal plates, rotary table for small articles, device platform etc. Due to the shelf for the soldering iron, the same floats above the table top. The soldering station is installed in the system channel. This creates space and order on the working place.

The shape of the system channel allows also the direct installation on the working place and is, therefore, a useful variant for the energy attachments. The inclined front of the device offers in addition ergonomic advantages for the operator.

Width of table	Width of system channel (TE units)	Order No.

highlight – the innovative lighting engineering

The erfi lighting engineering sets new standards in function, non-glaring, comfort and design. The light helps decisively to feel well at the working place. With the newly developed system lighting highlight, we managed to realise an absolutely non-glaring light for the working place. An innovative active light grid creates perfect light. The lamp of different designs is inserted in the system channel and

is thus part of the working place. An additional considerable advantage of the highlight lighting technology is the independance of the installation height. Up to 1,40 m height the active light grid guarantees non-dazzle working.

Article	All lamps (without sensolight) are equipped with an On/Off switch.	Power (watt)	TE-units	Order No.	
				fluorescent lamp ballast	electronic
Short lamps single power		36 W	95 TE	ALo4.1.361	ALo4.1.362

erfi-sensolight® - the new light dimension

erfi-sensolight stands for a new light dimension (registered design No. 202 05 736 4). Sensolight allows a clear improvement regarding ergonomics and energy consumption. erfi-sensolight is available in 3 different designs.

erfi-sensolight® level 1

Contactless switching on / off

The integrated lamp can easily be turned on/off without contact. By simply getting closer to the system channel with the hand, the sensor integrated in the system channel switches on or off. The function is so developed that an unintentional switching on / off is avoided.

erfi-sensolight® level 2

Contactless switching on / off and presence-dependent turning off (control of presence)

The additional sensor for presence guarantees that a short time after leaving the working place the light will be deactivated. The light turns on automatically when coming closer again to the working place. The control of presence also turns off when the on / off sensor will be deactivated.

erfi-sensolight® level 3 Contactless switching on / off and presence-dependent turning off (control of presence) and daylight control system with dimmer function

The daylight control system guarantees a perfect regulation of light at any hour of the night or day.

1. Dimmer function

By means of a dimmer the desired amount of light can be adjusted.

2. Daylight control system

If the ambient light is enhanced for example by sunshine, the lamp power reduces automatically. If the ambient light is reduced for example at dawn/dusk or by clouds, the amount of light is automatically increased. A regular and pleasant amount of light is thus ensured.

Savings: Particularly with level 2 and 3, considerable reductions in power consumption are guaranteed. Suitable for system channels.

erfi-sensolight® level 3 is only possible with the electronic fluorescent lamp ballast.

Article		TE fluorescent	Order No.
erfi-sensolight® level 1	Contactless switching on/off	10 TE	A61.001
erfi-sensolight® level 2	Contactless switching on/off and presence-dependent switching (control of presence)	10 TE	A61.002
erfi-sensolight® level 3	Contactless switching on/off, presence-dependent switching (control of presence) and daylight regulation by dimmer	10 TE	A61.003

Safety and switchgears

Note: Overall height: 113 mm

The insert board programme acto is useable with the following system components:

- System channel
- Energy attachment, energy cockpit
- Swivelling attachment
- 19" combined attachment, 19" combine cockpit

Regulating transformers, single-phase

Note: Overall height: 113

Best.-Nr. A95.010

Regulating transformer (unearthed)
0-30 VAC max. 2 A unearthed,
steplessly adjustable, unstabilized

Output AC:	2 safety laboratory sockets 4 mm
Display:	Moving iron instrument class 2,5, voltage: 0-30 V
	Moving iron instrument class 2,5, current: 0-2 A

Best.-Nr. A95.011

Regulating transformer (unearthed)
0-30 VAC max. 2 A unearthed,
steplessly adjustable, unstabilized,
changeable to: 0-24 VDC, residual ripple
approx. 50 % by an integrated bridge
connected rectifier

Output AC/DC:	2 safety laboratory sockets 4 mm
Display:	Moving iron instrument class 2,5, voltage: 0-30 V
	Moving iron instrument class 2,5, current: 0-2 A

Best.-Nr. A94.030

Regulating transformer (earthed)
0-260 VAC max. 1 A earthed,
steplessly adjustable, unstabilized

Output AC:	Shockproof socket
Display:	Moving iron instrument class 2,5, voltage: 0-260 V
	Moving iron instrument class 2,5, current: 0-1 A

Note: not useable in system channels

Best.-Nr. A95.012

Regulating transformer (unearthed)
0-24 VAC max. 4 A unearthed,
steplessly adjustable, unstabilized,
changeable to: 0-19 VDC, residual ripple
approx. 50 % by an integrated bridge
connected rectifier

Output AC/DC:	2 safety laboratory sockets 4 mm
Display:	Moving iron instrument class 2,5, voltage: 0-30 V
	Moving iron instrument class 2,5, current: 0-4 A

Best.-Nr. A92.03C

Regulating transformer (earthed)
0-260 VAC max. 1 A earthed,
steplessly adjustable, unstabilized

Output AC:	3 safety laboratory sockets 4 mm (L1, N and PE)
------------	---

Note: not useable in system channels

Best.-Nr. A93.03C

Regulating transformer (unearthed)
AC: 2-260 VAC max. 1 A unearthed,
steplessly adjustable, unstabilized
DC: 2-200 V DC unscreened, residual ripple
approx. 50 % by an integrated bridge
connected rectifier

Output AC:	3 safety laboratory sockets 4 mm (L1, N and PE)
Output DC:	2 safety laboratory sockets 4 mm

Note: not useable in system channels

Best.-Nr. A94.031

Regulating transformer (unearthed)
2-260 V AC max. 1 A unearthed,
steplessly adjustable, unstabilized

Output AC:	3 safety laboratory sockets 4 mm (L1, N and PE)
Display:	Moving iron instrument class 2,5, voltage: 0-260 V
	Moving iron instrument class 2,5, current: 0-1 A

Note: not useable in system channels

Best.-Nr. A94.033

Regulating transformer (unearthed/earthed)
steplessly adjustable voltages,
unstabilized AC: 10-12 V AC max. 12 A
unearthed AC 2: 0-24 V AC max. 6 A
unearthed AC3: 2-260 V AC max. 2 A

Output AC 1+2:	2 safety laboratory sockets 4 mm each
Output AC 3:	3 safety laboratory sockets 4 mm (L1, N and PE)
Bridge connected rectifier:	built-in for external wiring

Note: not useable in system channels and energy
attachments/cockpits of 130 mm depth

Best.-Nr. A94.032

Regulating transformer (unearthed)
2-260 V AC max. 2 A unearthed,
steplessly adjustable, unstabilized,
changeable to: 2-200 V DC by an
integrated bridge connected rectifier

Output AC:	Socket without earthing contact
Output DC:	2 safety laboratory sockets 4 mm
Display:	Moving iron instrument class 2,5, voltage: 0-260 V
	Moving iron instrument class 2,5, current: 0-2 A

Note: not useable in system channels and energy
attachments/cockpits of 130 mm depth system

Best.-Nr. A94.034

Regulating transformer (unearthed/earthed)
steplessly adjustable voltages, unstabilized
AC 1: 0-6 V AC max. 15 A unearthed
AC 2: 0-18 V AC max. 6 A unearthed,
AC3: 0-42 V AC max. 3 A earthed
AC 4: 2-260 V AC max. 2 A earthed

Output AC 1-3:	2 safety laboratory sockets 4 mm each
Output AC 4:	3 safety laboratory sockets 4 mm (L1, N and PE)
Bridge connected rectifier:	built-in for external wiring

Note: not useable in system channels and energy
attachments/cockpits of 130 mm depth

Note: All regulating transformers are equipped with 1 thermal (primary) and thermal-magnetical (secondary) over-current releases and 1 illuminated power switch.

Direct-current supplies / Solid voltage sources

Note: Overall height: 113 mm

*Technical Data lengthwise regulated supply units:

Best.-Nr. A24.050

Solid voltage source
±5 V/3 A
lengthwise regulated supply unit*

Output data:	permanently resistant to sustained short circuit, lengthwise regulated, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets

Best.-Nr. A23.05*

Solid voltage source
24 V/1,5 A
clock-actuated supply unit
Technical data clock-actuated supply unit:
Output specification:
Deviations
- Input voltage change: +/- 0,2% max.
- Change of load: +/- 0,8 % max.
General specification:
Temperature coefficient: +/- 0,01 % /C°

Output data:	permanently resistant to sustained short circuit, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets

Best.-Nr. A24.051

Solid voltage source
24 V/5 A (10 A peak)
clock-actuated supply unit
Technical data clock-actuated supply unit:
- Double nominal peak power when switching-on
- Power factor and harmonic wave improvement as per EN61000-3-2
- Load stabilization: 192 mV max.
- Residual ripple and noise: 360 mV max.

Output data:	permanently resistant to sustained short circuit, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets

Best.-Nr. A24.052

Solid voltage source
2 x 12 V/2 A
switchable parallel and in series resp. lengthwise regulated supply unit*

Output data:	permanently resistant to sustained short circuit, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets

Best.-Nr. A24.053

Solid voltage source
2 x 15 V/2 A
switchable parallel and in series resp. lengthwise regulated supply unit*

Output data:	permanently resistant to sustained short circuit, lengthwise regulated, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets

Best.-Nr. A25.050

Solid voltage source
±/- 12 V/1 A and 5 V/3 A
lengthwise regulated supply unit*

Output data:	permanently resistant to sustained short circuit, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets 1 shockproof socket 230 V / 16 A in addition

Note: not useable in system channels

Best.-Nr. A25.051

Solid voltage source
±15 V/1 A and 5 V/3 A
lengthwise regulated supply unit*

Output data:	permanently resistant to sustained short circuit, lengthwise regulated, switchable in series and parallel
Outputs:	4 mm safety laboratory sockets 1 shockproof socket 230 V/16 A in addition

Note: not useable in system channels

Telecontrollable regulating supply units

with integrated interface at the front, ramp generator and device software highlink® and LabVIEW device drivers resp.
(see page 37, to be ordered separately) Note: Overall height: 113 mm

Technical Data:

Interface: addressable serial interface RS-232
Ramp generator: for any voltage curves
Ramp parameters: initial and final voltage, speed, time per ramp step, number of cycles
Operation: manual or remote controlled
Bidirectional function: output voltage and current limitation programmable, actual measured value transfer of current and voltage via interface
Plug and Play: automatic recognition of device type by highlink® software or LabVIEW device driver (option)
Output data: permanently resistant to sustained short circuit, lengthwise regulated, switchable in series and parallel

Deviation in case of load changes of 0 to 100 %
Voltage: 2 mV/A
Current: 0,02 mA/V
Temperature coefficient:
Voltage: 0,005 %/K
Current: 0,013 %/K
Residual ripple:
Voltage: 0,2mV_{eff}
Current: 0,5mA_{eff}
Stabilization time in case of a load bounce of
0 % to 100 %: 15 µs
100 % to 0 %: 500 µs
Outputs: 4 mm safety laboratory sockets

Telecontrollable functional generators inclusive counters

Note: Overall height: 113 mm

erfi is the first manufacturer of laboratory furniture systems for electric engineering and electronics who presents telecontrollable 19" functional generators and 19" regulating supply units in connection with a modern network software (highlink) in professional working place systems. Another proof of the innovative leadership of erfi. The completely newly developed functional generator family offers an excellent functionality and parameters such as remote

control by means of a modern software, large frequency range up to 20 MHz, amplitudes up to 30 V_{ss} and frequency counters of up to 100 MHz. This new generator generation meets all requirements one can think of. Multi-lingual menu technique in connection with elegant rotary encoders and the new „Comand“ function keys are a special feature of this generator class. New portalecasing render the device programme acto even independent of the relevant working place.

The new graphic display of vacuum fluorescent technique allows perfect reading even at a distance of 3 m, independently of the reading angle! The display is in blue and has a high focus and brilliance.

Order No.	Size	Design
A34.020	56TE	0,1Hz – 20MHz, 20V _{ss} , Counter up to 30 MHz
A34.021	56TE	0,1Hz – 10MHz, 30V _{ss} , Counter up to 30 MHz
A34.022	56TE	0,1Hz – 20MHz, 20V _{ss} , Counter up to 30 MHz
A34.023	56TE	0,1Hz – 10MHz, 30V _{ss} , Counter up to 30 MHz
A34.050	-	Amplifier approx. 20dB, DC

- telecontrollable by RS232 or USB2.0 interface (options)
- comprehensive control software highlink (option) or LabVIEW device driver (option)
- innovative menu-driven commutation with modern graphic display in blue colour
- Comand function keys for a fast access to main functions
- elegant rotary encoder for a comfortable menu control
- excellent frequency range up to 20 MHz
- 8-digit frequency counter up to 100 MHz

Display:	graphic display of vacuum fluorescent technique, blue
Menu language:	reversible German / English
Operation concept:	elegant rotary encoder with push function as well as Comand function keys for optimal handling
Functions:	sinus, delta, rectangle, saw tooth, ramp operation, amplifier, DC, individual impulse, variable pulse-duty factor
Operation modes:	unsolicited, external wobbling, internal wobbling (sweep operation), PWM operation
Frequency range:	0,1 Hz-20 MHz or models A34.020 and A34.022 0,1 Hz–10 MHz for models A34.021 and A34.023
Amplitude:	0-20 V _{ss} for models A34.020 and A34.022 0-30 V _{ss} for models A34.021 and A34.023
Amplifier:	aprox. 20dB amplification, DC, order No. A34.050
Individual impulse:	variable, positive impulse with release by a key, adjustable impulse length
Outputs:	20V _{ss} no-load operation for models A34.020 and A34.022 30V _{ss} no-load operation for models A34.021 and A34.023

USB Port 2.0 interface
(at the front, option)

RS232 serial interface
(at the front, option)

Inputs:	5V TTL-compatible, 50Ω-output impedance Ext, Ub, m OWM PWM In, VCO In, reductor: 0-30 dB continuous, in addition 20dB and 40dB connectable through the same socket
DC offset:	-10 to +10V, 0V with push-button
Wobble operation, external:	
VCO input:	0-5 V control voltage input for frequency change of max. 1:100
Wobble operation, internal: Sweep operation, start and stop frequency, wobble frequency: max. 100 Hz in 1Hz steps	
PWM operation:	
Control input:	-2,5 V to +2,5 V control voltage input for pulse-pause ratio
Frequency counter:	
Measuring range:	0,1 Hz to 30 MHz for models A34.020 and A34.021 0,1 Hz to 100 MHz for models A34.022 and A34.023
Input:	external, BNC socket
Input voltage:	0,5V _{eff} to 100V _{eff}
Display:	2 x 16 Digits

Telecontrol operation for functional generators and counter operation (option)

Due to the interfaces available as an optionally (serial RS232 or USB2.o) the new functional generators are useful for everything. The telecontrol allows the programming of the functional generators and of the integrated counter. This functionality makes it possible to use the new functional generator family for automated measuring and regulating. The telecontrollable functional generators have been developed for the industrial use as well as for the didactic training centre. They are an ideal and in our times modern tool with many valuable functions.

Interfaces: (option)

Order No.	Design
A34.020.01	serial interface RS232 (option), alternatively:
A34.020.02	USB2.o interface (option)

Note:

When ordering the interface A34.020.01 or A34.020.02, please order also the highlink® software A34.020.10 or the LabVIEW device driver A34.020.11.

The software „highlink“ or the „LabVIEW device driver“, both available as an option, allow the comfortable access to the device.

The following parameters are programmable with limits by means of the optional interfaces (RS232 or USB2.o):

- Selection of the operation mode: unsolicited, external wobbling, internal wobbling (sweep operation), PWM operation
- Functions/curves: sinus, delta, rectangle, saw tooth, ramp operation, amplifier, DC, individual impulse, variable pulse-duty factor
- Frequency: 0-20 MHz or 0-10 MHz resp.
- Amplitude: 0-20V_{ss} or 0-30V_{ss} resp.
- DC-Offset: -10V to +10V
- Reductor: 0-30dB, 20dB and 40dB
- Sweep parameter: start and stop frequency, wobble frequency
- Counting frequency: can be read

highlink® - software and LabVIEW device driver (option)

Order No.	Design
A34.020.10	highlink® - software for functional generators and for regulating supply units

highlink® – software:

This innovative software package allows the programming of telecontrollable parameters of the erfi functional generators (see above) as well as the parameters of the telecontrollable erfi regulating supply units (see page 35) due to the user-friendly operating panel. Virtual transformers and input spaces ensure an optimal and rational handling for telecontrol operation. highlink® is a registered trademark and allows in addition the data logging of the generators and supply units. Programmable ramps by means of supply units are also possible through table functions. (See page 35 and the separate catalogue „Telecontrollable supply unit generation highlab and basic). Consequently, highlink® is the decisive step to link groups of devices and working places. Complete laboratories and individual devices can be telecontrolled in a modern way. highlights such as the plug-and-play function ensure that each connected and active device is automatically recognized. A comfort unattainable in the past, joined with perfect functionality.

LabVIEW device drivers

The erfi device drivers are ideally suited for all developers using the development tool LabVIEW. The individual functions of the erfi functional generators and erfi supply units (see page 35) are summarized in libraries and can easily be incorporated in the project concerned.

Order No.	Design:
A34.020.11	LabVIEW device driver for erfi functional generators
A34.020.12	LabVIEW for erfi regulating supply units (see page 35)

Pneumatic units / energy and accessory devices

Note: Overall height: 113 mm

Pneumatic supply

- Output pressure for coupling 1 and 2: 0 to 3 bar and 0 to 10 bar resp., continuously adjustable, pressure reducer with fixing device and excess pressure protection
- Output pressure for coupling 3: direct taking-out of the input pressure
- Output: All 3 coupler sockets KD 1/8 with automatic shut-off
- Input: at the back for a hose of 6 mm inside diameter

Compressed air outlet

Compressed air inlet:
at the back for a hose of 6 mm inside diameter
Compressed air outlet:
air-operated coupling with automatic shut-off
DN5 Operating pressure: max. 10 bar

Bus coupler field

Allows the drive of several supply unit and functional generators by a PC. In connection with the device driver highlink, all connected devices can be safely controlled by a PC. (A condition hereof: highlink® software)

- 1 serial connection at the front for PC (RS232 adressable)
- 4 or 8 pcs. resp. serial connections at the front for 4 or 8 telecontrollable erfi devices, completely interlinked at the back.

Entlade-schaltung:
Taster mit Umschalter und Entlade-widerstand 10 kOhm.

RC-decade

Combination device with integrated R and C decade for the experimental finding-out of resistance and capacity values.

Discharge switching:	Resistance range: 1 Ohm to 999,999 kOhm in steps of 1 Ohm
Precision:	= ± 1% above 40 Ohm = ± 4% from 40 Ohm to 13 Ohm = ± 6 % from 12 Ohm to 3 Ohm = ± 10 % with 2 Ohm and 1 Ohm
Current-carrying capacity:	max. 1W
Voltage:	max. 250 V (50 Hz)
Capacity range:	100 pF to 9.9999 µF in steps of 100 pF
Precision:	= ± 2 % above 1nF = ± 10 % from 1 nF to 100 pF

RC Logade

Resistance range:	100 Ohm to 680 kOhm series E 6
Tolerance:	± 2 %
Current-carrying capacity:	max. 0,5 W
Voltage:	max. 400 V DC
Capacity range:	100 pF to 680 nF series E 6
Tolerance:	± 10 %
Voltage:	max. 250 V DC

L-Logade

For the experimental finding-out of inductivity values with testing and experimenting circuits. The inductivity can be adjusted by a rotary-type switch.

Range of values:	1 µH to 4700 µH, graded as per series E 6 (23 values)
Precision:	1 µH to 33 µH +- 10 % 47 µH to 4800 µH +- 5 %
Operating voltage:	max. 1000 V DC
Operating current:	max. 63 mA, with a fine fuse protection

Energy and accessory devices / others / empty panels

Note: Overall height: 113 mm

Best.-Nr. A12.06C

Continuity tester, optical and acoustical
optical by a green luminous field for resistances of low impedance, acoustical by a loudspeaker for resistances of high impedance

Connection: 2 pcs. 4 mm safety laboratory sockets for optical testing,
2 pcs. 4 mm safety laboratory sockets for acoustical testing

Electric strength: up to approx. 400 V AC with acoustical continuity testing

Testing voltage: aprox. 24 V AC with optical continuity testing

Best.-Nr. A13.06C

Solder station 80 Watt with digital indication
Scope of supply inclusive solder pencil WSP 80 and holder WPH for WSP 80

- electronic regulating electronics
- temperature range 50° C to 450° C, adjustable by keys
- 3-digit digital indication for nominal and set value
- tolerance $\pm 2\%$ of the final value
- automatic tool recognition
- external input device (WCB1/WCB2, optional) can be connected for time and locking positions.
- equipotential bonding (in initial state tightly earthed)

Best.-Nr. A11.01*

Ring circuit panel
6 pcs. 4 mm safety laboratory sockets with 6,3 mm flat plug for connection of ring circuits, not wired

Best.-Nr. A11.06C

Ring circuit panel
- 6 pcs. 4 mm safety laboratory sockets, flat plug for connection of ring circuits, not wired
- 3 pcs. BNC sockets, not wired

Best.-Nr. A12.01C

Data socket
1 Data socket RJ45, double socket Cat 6, not wired

Best.-Nr. A12.03C

Telephone socket
1 telephone socket TAE 6 N, triple, not wired

Interface panels

Best.-Nr. A10.00*

2 pcs. PS2 sockets for keyboard and mouse, inclusive connection cable

Best.-Nr. A10.00*

2 pcs. USB sockets, inclusive connection cable

Best.-Nr. A10.00*

2 pcs. SubD sockets, 9 poles, male, inclusive connection cable

Best.-Nr. A10.004

1 pc. SubD socket, 25 poles, female, inclusive connection cable

Best.-Nr. A10.00*

2 pcs. stereo jack bush- es 3,5 mm inclusive connection cable

Energy attachments and energy cockpits, compact and modular

The energy attachments and energy cockpits are the most economic solution for the basic equipment of an electronic working place. In the front they all have a 19 inch rail to take up the 19 inch insert board programme

acto. With this attachment and cockpit technology, a lot of measurements can be realised.

Energy cockpits can also be directly mounted on system channels.

Absolutely flexible, the 19“ device attachments

The 19“ device attachments are available of overall heights of 3HE and 6HE and are suited for the professional integration of the 19“ devices basic and highlab resp.

As a standard the attachments are equipped with a professional 19“ installation mechanism and thus guarantee also the possibility of properly installing 19“ devices of another make.

The DINA 4 – cockpits – functional and versatile

The DINA 4 attachments and DINA 4 cockpits have an inside height of 330 mm and are therefore ideally suited for holding A4 files. Between a 19" HE device cockpit and a DINA 4 cockpit there is a

difference in height of 54 mm. With linear table combinations the 19" device cockpit and the DINA 4 cockpit are flush at the top.

DINA 4 – attachment

The partition wall in the middle allows a high load on the top.

Modern and ergonomic, the 19“/3 HE device cockpits

A professional work organisation is a prerequisite everywhere. With the newly developed cockpit modules ABZ offers a great variety. The freely suspended device cockpit was already presented and launched on the market by erfi as forerunner in the electronic industry.

The result of the consistent further development of these ergonomic system components are the overall height and the desing of the front. The device cockpits are mounted to the rear aluminium system profiles.

ABZ® - liftline – variable working heights due to the professional clamp connection, alternatively by a crank adjustment or an electric drive resp.

A study has proven that almost 70 % of staff members who had a working place with an integrated height adjustment for a period of three months said that their

well-being improved considerably during this time or that health problems were reduced. And almost all participants namely 92 % realized that the change

between a sitting and a standing position was of advantage.

Technical Data of manual height adjustment

Stroke: 100 mm from 780 mm up to 880 mm
or
200 mm from 780 mm to 980 mm
or
300 mm from 780 mm up to 1080 mm
or
400 mm from 780 mm up to 1180 mm
Adjustment: By unscrewing the clamping screws at all 4 table legs. Interior second pipe in the leg can be extended steplessly.

(*) Other strokes deliverable on request.

Technical data of crank drive

Stroke: 300 mm from 780 mm up to 1080 mm
or
400 mm from 780 mm up to 1180 mm
Load on table: 220 kg maximum, 350 kg (alternatively)
Lifting speed: approx. 5 mm per turn of the crank (*)
Drive: 4 hydraulic cylinders integrated in the legs, with pump and crank, can be folded down. The crank being folded-in disappears completely underneath the work top.
Radius of crank: 125 mm

(*) The lifting speed may slightly vary depending on the load on the table.

Technical data of electric drive:

Stroke: 280 mm from 780 mm up to 1060 mm
or 380 mm from 780 mm up to 1160 mm
Load on table: 220 kg maximum, 350 kg (alternatively)
Lifting speed: approx. 30 mm/s with a load on table of 220 kg approx. 15 mm/s with a load on table of 350 kg
Drive: 4 Hydraulikzylinder in Füße systemadäquat integriert, mit Pumpe und Elektromotor, Sicherung vor Überlast inkl.
Note regarding duty cycle: The drive is designed for permanent operation. When using the maximum load, the drive needs a break of approx. 20 min. after 1 min. running. It is protected against overload by a temperature switch.

Assembly trolleys

Basic equipment:

Work top and shelves:	Plastic with an angular iron frame, shelf with a rounded-off edge of 5 mm
Steel frame:	Profile pipe 30x2 mm, 4 steering wheels 75 mm Ø, 2 of them lockable, loading capacity 150 kg
Drawer:	Steel, with organizational elements, usable depth 490 mm, partially extendable
Locking:	Safety cylinder for individual and central locking, general locking system on request
Size:	490 x 600 x 780 mm high
Selection of pattern:	See page 10-11
Conductive design as an alternative:	Wheels, top board, base, drawers of conductive design

Assembly trolley:

1 Drawer, front height 3 HE
with single extension
1 Shelf

Not conductive design:

Order No. 04.19.0001

Conductive design:

Order No. 04.19.0002

Additional price for full drawer extension:

Order No. 04.19.0020

Assembly trolley:

1 Drawer, front height 3 HE
with single extension

2 Shelves

Not conductive design:

Order No. 04.19.0003

Conductive design:

Order No. 04.19.0004

Assembly trolley:

2 Drawers, front height 3 HE
with single extension

1 Shelf

Not conductive design:

Order No. 04.19.0005

Conductive design:

Order No. 04.19.0006

Assembly trolley:

2 Drawers, front height 3 HE
with single extension

1 Drawer, front height 5 HE

with full extension

Not conductive design:

Order No. 04.19.0007

Conductive design:

Order No. 04.19.0008

Side tables with a shelf

4 different side tables are available for designing and completion of working places. On request, shelves can be set back.

Basic equipment:

Table top:	approx. 30 mm thick, with a plastic banding all around
Steel frame:	Profile pipe 40 x 2 mm, solidly welded with welded-on legs
Shelves:	Laminated on both sides, welded-in angular profiles
Sliding doors:	Suspended design placed on roller bearings, made of plastics
Locking:	Safety cylinder, individual locking, main locking system. on request
Selection pattern:	See page 10-11
Conductive design:	For conductive side tables the work top is volume conductive. All other components such as shelves and cabinets with sliding doors are not conductive of this design. On request, all components are available as conductive design.

Type 20.1 Standard
Type 20.2 Conductive design

Typ 20.3 Standard
Typ 20.4 Conductive design

Typ 20.5 Standard
Typ 20.6 Conductive design

Typ 20.7 Standard
Typ 20.8 Conductive design

Movable

All side tables can be completed by steering wheels. For the types 20.1 and 20.2 a reinforcement of the bottom frame will be necessary. On request, movable tables can be equipped with lateral handles.

Options:

Reinforced bottom frame	At the side and back for tables type 20.1 and 20.2	04.20.9001
Reinforced bottom frame	At the side and back for tables type 20.1 and 20.2	04.20.9002
V2A glider	 for EGB table instead of discharge connection	04.20.9003
Steering wheels	Ø 100 mm, 2 of them fixable, standard	04.20.9004
Steering wheels	Ø 100 mm, 2 of them completely fixable, standard	04.20.9005
Steering wheels	Ø 100 mm, 2 of them completely fixable, EGB	04.20.9006
Steering wheels	 Ø 125 mm, 2 of them completely fixable, standard	04.20.9007
Steering wheels	 Ø 125 mm, 2 of them completely fixable, EGB	04.20.9008
Fixation for steering wheels	Ø 100 mm	04.20.9009
Complete fixation for steering wheels	Ø 100 mm and Ø 125 mm	04.20.9010
Handle	at the left or right (please indicate in your order)	04.20.9011

System components for the assembly world

Universal assembly extension arm

- consisting of two high-quality aluminium system profiles inclusive fastening material
- for installing working place lamps, rails and universal compressed air supply lines

	Order No.
Universal assembly extension arm	04.22.100

Rail with tool carriage

- for installing balancers for air operated and electric tools
- steplessly adjustable in depth

Width of table	Order No.
1200 mm	04.22.1112
1600 mm	04.22.1116
1800 mm	04.22.1118
2000 mm	04.22.1120

Universal compressed air supply rail

- for connecting several air-operated tools
- steplessly adjustable in depth

	Couplings / Order No.
Width of table	4 Pcs.
1200 mm	04.22.1212
1600 mm	04.22.1216
1800 mm	04.22.1218

Lighting systems

Point light lamp

- Lamp body made aluminium with heat protection casing
- Equipment: Halogen lamp 20 W, lamp covering made of glass
- Lamp body Ø 71 x 80 mm black
- Rods 280 + 425 mm, stone-gray RAL 7030
- Voltage: 230 V, 50/60 Hz
- Built-in transformer

With universal adapter for the lateral fastening to an aluminium leg

Design	with table leg	
Order No.	04.22.1601	04.22.2.1602

Fan lamp

- Lamp body made of plastics
- Equipment: Ring lamp 22 W
- Lamp body Ø 247 mm, light-gray RAL 7035
- Rods 410 + 410 mm, light-gray RAL 7035
- Voltage: 230 V, 50 Hz
- Built-in fluorescent lamp ballast
- Fan for separate switching on/off and freely blowing, equipped with an active carbon filter

With universal adapter for the lateral fastening to an aluminium leg

Design	with table leg	
Order No.	04.22.1604	04.22.1605

Magnifying lamp

- Lamp body made of plastics
- Equipment: Compact LS lamp 11 watt
- Lamp body 270 x 67 x 52 mm, gray-white approx. RAL 9002
- Rods 400 + 420 mm, gray-white approx. RAL 9002
- Voltage: 230 V, 50 Hz.
- Plug-type fluorescent lamp ballast
- Magnifying glass 4 diopeters, Ø 120 mm

With universal adapter for the lateral fastening to an aluminium leg

Design	with table leg	
Order No.	04.22.1607	04.22.1608

Office and computer working places

- Lamp body made of plastics
- Equipment: 2 compact LS lamps 9 watt
- Lamp body 223 x 210 x 57 mm, dust-gray RAL 7037
- Rods 445 + 400 mm, light-gray RAL 7035
- Voltage: 230 V, 50 Hz
- Plug-type fluorescent lamp ballast

With universal adapter for the lateral fastening to an aluminium leg

Design	with table leg	
Order No.	04.22.1610	04.22.1611

Perforated sheet metal walls and accessories

	117 x 173 x 32 mm	-	04.22.1824	04.22.1825
	167 x 245 x 32 mm	-	04.22.1826	04.22.1827
Tongue	90 x 277 x 54 mm	0,69 l	04.22.1830	04.22.1831
	131 x 277 x 54 mm	1,05 l	04.22.1832	04.22.1833

Accessories for cases:

(suitable for all 4 sizes)

Fastening clip for labels

Order No. 04.22.1840 (10 pcs.)

Labels, lined

Order No. 04.22.1841 (10 pcs.)

Horizontal holding profile

Width of table	Order No.
1200 mm	04.22.1850
1600 mm	04.22.1851
1800 mm	04.22.1852
2000 mm	04.22.1853

Universal profile frame with displaceable shelves for the cases

Width of table	Order No.
1200 mm	04.22.1855
1600 mm	04.22.1856
1800 mm	04.22.1857
2000 mm	04.22.1858

Labels for visual stock boxes

10 pcs. each

suitable for type	Order No.
1	04.22.0001
2, 3, 4, 5	04.22.0002

Visual stock boxes made of plastics

- Colour: blue (not conductive), black (conductive)
- resistant against most acids and lyes
- Temperature resistant between -40° and +80° C

Design	Type	Size (width x	Contents	Order No.
		depth x height)	(litres)	
not conductive	1	100 x 160 x 75 mm	0,80 l	04.22.1860
	2	150 x 230 x 130 mm	2,60 l	04.22.1861
	3	220 x 350 x 200 mm	10,4 l	04.22.1862
	4	320 x 500 x 200 mm	23,5 l	04.22.1863
	5	470 x 520 x 300 mm	57,0 l	04.22.1864
conductive (ESD)	1	95 x 160 x 76 mm	0,80 l	04.22.1865

High-quality swiveling technique

Universal adapter

Order No. 04.23.001

- for the quick and simple adaptation to the aluminium leg system profile
- designed for heavy loads
- steplessly adjustable in height

Auxiliary swivel arm

Order No. 04.23.002

- the solid round bolt is directly plugged in the universal adapter
- the basic swivel arm is

Basic swivel arm

Order No. 04.23.003

- Designed as single swivel arm (see small photograph below): the solid round bolt is directly plugged in the universal adapter
- Designed as double swivel arm (see big photograph below): the solid round bolt is directly plugged in the auxiliary swivel arm
- the swiveling elements can be fitted at the other end of the swivel arm

Swiveling elements

Holding frame type 1 for visual stock boxes

Design	for visual stock boxes	Number of boxes	Order No.
Single-sided fitting	Type 1	15	04.23.010
	Type 2	6	04.23.011
Double-sided fitting	Type 1	30	04.23.012
	Type 2	12	04.23.013

Holding frame type 2 for visual stock boxes

Design	for visual stock boxes	Number of boxes	Order No.
Single-sided fitting	Type 1	7	04.23.020

Inclined tray for visual stock boxes

- is directly placed on the work top
- rubber buffers at the underside avoid an unintentional displacement

Design	for visual stock boxes	Number of boxes	Order No.
Single-sided fitting	Type 1	6	04.23.025
	Type 2	4	

Storage plates, circulat storage plates, documentation

Swiveling storage plate

- inclusive rubber mat
- for preparing material, accessories etc.

Size (width x depth)	Order No.
700 x 250 mm	04.23.030
600 x 400 mm	04.23.031

Note:

For swiveling storage plates, circular storage plates and information boards, please indicate separately the universal adapter and the swivel arms listed on page 57.

Circular storage plate 360°

- for small items

Size (width x depth)	Order No.
not conductive	04.23.032
conductive (ESD)	04.23.033

Information board

- inclusive 4 solenoids
- slewable to the back by 90°

Size (width x depth)	Order No.
DIN A4 high	04.23.034
DIN A4 transverse	04.23.035
DIN A3 high	04.23.036
DIN A3 transverse	04.23.037

Holder for foil bags

Order No. 04.23.038

- with 10 foils DIN A4 for documents
- optionally for the direct fastening to the table top or to the aluminium leg system profile by means of the universal adapter

Others

Cable comb

for approx. 40 laboratory cords
Order No.
04.23.039

Holder for measuring lines, slewable by 180°

optionally equipped at one or two sides with:

- 1 hose holder with 3 depositing possibilities
- 1 laboratory cord holder 300 mm long with 21 supporting elements

Design	Order No.
Single-sided fitting	04.23.040
Double-sided fitting	04.23.041

Others

Bottle holder

- for bottles and square drinks
- steel wire, light-gray, coated with plastics

Order No. 04.23.042

Cup holder

- for cups and beakers
- plastic, black

Order No. 04.23.043

Hook for accessories

- length 50 mm
- Ø 6 mm
- Steel

Order No. 04.23.044

Cable roll holder

- for installation between two aluminium leg system profiles of an ABZ table
- steplessly adjustable in height
- removable bar Ø 18 mm

Width of table	Order No.
1200 mm	04.23.047
1600 mm	04.23.048
1800 mm	04.23.049
2000 mm	04.23.050

Waste paper basket with separating system, 18 litres

- inclusive adapter and swivel arm (380 mm long)
- waste paper basket inclusive 2 inserts 2,2 litres and 2 hinged

Pattern	Order No.
Waste paper basket light-gray	
2 Inserts stone-gray	04.23.045
1 Hinged lid gray	
1 Hinged lid green	
Waste paper basket black	
2 Inserts black	04.23.046
1 Hinged lid gray	
1 Hinged lid green	

Ergonomic foot rests

Model 1 (not conductive)

- colour black-chrome
- chromium-plated rack on non-skidding rubber legs
- solid base plate, simply adjustable by the push of the foot
- height adjustment 50 – 100 mm

Model 2 (not conductive, alternatively conductive)

- colour black
- adjustable by an inclination fitted at the underside
- with the conductive design the foot rest can be connected directly to the earthing potential by an earthing point, leak 10 MΩ
- height adjustment at the front 30-00 mm, at the back 70-175 mm

Model 3 (not conductive and conductive resp.)

- directly connected with the table, fits optimally in shape and function to the table system
- steplessly inclinable and horizontally displaceable
- height adjustable
- leak 10 MΩ

	Order No.	
Design	not conductive	conductive
Model 1	04.23.051	-
Model 2	04.23.052	04.23.053
Model 3	04.23.054	04.23.055

Electric energy supply

horizontal attachment for multiple connector strips

- for installation to two aluminium leg system profiles of an ABZ table
- steplessly adjustable in height
- for the lateral insertion of multiple connector strips
- with two openings for the feedthrough of mains supply lines

Cable tray

Ideal for placing-in a large amount of cables and multiple connector strips. Accessible from the front, open at the sides for the optimal feedthrough. Optionally directly connected with the steel frame or adjustable in height at the aluminium leg profile adapted at the back.

Size: Usable height: 160 mm, depth of groove: 160 mm, edged at the front: 40 mm

Width of table	Order No.
1200 mm	04.23.060
1600 mm	04.23.061
1800 mm	04.23.062
2000 mm	04.23.063

Cable tray fitted directly to the steel frame

Width of table	Order No.
1200mm	04.23.070
1600mm	04.23.071
1800mm	04.23.072
2000mm	04.23.073

Cable tray fitted to the aluminium leg profile, adjustable in height

Tischbreite	Order No.
1200mm	04.23.074
1600mm	04.23.075
1800mm	04.23.076
2000mm	04.23.077

Multiple connector strips

- casing made of shockproof PP, free from chlorine and halogene
- shockproof sockets DIN 49440, 250 V ~, 16 A
- connection line 2 m with shockproof angular plug
- arrangement of sockets 45°
- colour anthracite-gray similar to RAL 7016

Multiple connector strips with overvoltage protection, 16 A

- casing made of shockproof PP, free from chlorine and halogene
- shockproof sockets DIN 49440, 250 V ~, 16 A
- connection line 2 m
- arrangement of sockets 45°
- colour anthracite-gray similar to RAL 7016
- with optical danger signal

Industrial multiple connector strips

- casing made of shockproof PP, free from chlorine and halogene
- shockproof sockets DIN 49440, 250 V ~, 16 A
- connection line 2 m with shockproof angular plug
- arrangement of sockets 45°
- colour orange similar to RAL 2004

Design	Sockets	Width of strip	Order No.
without switch	5-fold	384 mm	04.23.080
	6-fold	428 mm	04.23.081
with switch, 2 poles, illuminated	5-fold	384 mm	04.23.082
	6-fold	428 mm	04.23.083

Design	Sockets	Width of strip	Order No.
with switch, 2 poles, illuminated, without supply filter	5-fold	472 mm	04.23.084
	6-fold	516 mm	04.23.085
with switch, 2 poles, illuminated, with supply filter	5-fold	560 mm	04.23.086
	6-fold	604 mm	04.23.087

Design	Sockets	Width of strip	Order No.
without switch	3-fold	296 mm	04.23.088
with switch, 2 poles, illuminated	3-fold	296 mm	04.23.089

Electric energy supply

Vertical aluminium energy channel

- for fitting to the aluminium leg profile
- 5 designs available

Design 1:

- 4 x shockproof socket 230 V/50 Hz
- acoustical continuity tester
- compressed air connection
- On/off switch for the light at the universal assembly extension arm or for another consumer point at the working place

Order No. 04.23.090

Design 2:

- 4 x shockproof socket 230 V/50 Hz
- RJ 45 double socket CAT 6, not wired
- compressed air connection
- On/off switch for the light at the universal assembly extension arm or for another consumer point at the working place

Order No. 04.23.091

Design 3:

- fuse protection unit:
Emergency shut-off push-button,
room emergency shut-off prepared,
motor protection switch 10-16A with
built-in undervoltage release,
NFI switch, leakage current 30 mA,
nominal current 25 A
- 2 x shockproof socket 230 V/50 Hz
- compressed air connection
- On/off switch for the light at the universal assembly extension arm or for another consumer point at the working place

Order No. 04.23.092

Design 4:

- fuse protection unit:
Emergency shut-off push-button,
room emergency shut-off prepared,
motor protection switch 10-16A with
built-in undervoltage release,
NFI switch, leakage current 30 mA,
nominal current 25 A
- 2 x shockproof socket 230 V/50 Hz
- socket without earthing contact by
isolating transformer for taking-out
unearthed alternating voltage 230 V/max.
75 VA, 50 Hz. inclusive safety fuse
- compressed air connection
- On/off switch for the light at the universal assembly extension arm or for another consumer point at the working place

Order No. 04.23.093

Design 5:

- fuse protection unit:
Emergency shut-off push-button,
room emergency shut-off prepared,
motor protection switch 10-16A with
built-in undervoltage release,
NFI switch, leakage current 30 mA,
nominal current 25 A
- shockproof socket 230 V/50 Hz
- acoustical continuity tester
- compressed air connection
- On/off switch for the light at the universal assembly extension arm or for another consumer point at the working place

Order No. 04.23.094

Experiment frames – for installing DIN A4 experiment plates

Experiment frames
with extension arm,
displaceable in an
elongated hole

for basic tables and basic tables with attachments

Experiment frames			
Width of table	1 row	2 rows	3 rows
1200 mm	04.25.0121	04.25.0122	04.25.0123
1600 mm	04.25.0161	04.25.0162	04.25.0163
1800 mm	04.25.0181	04.25.0182	04.25.0183
2000 mm	04.25.0201	04.25.0202	04.25.0203

for basic table with 19 inch racks

Width of rack/experiment frame 2 rows			
Width of table	257 mm	328 mm	525 mm
1200 mm	04.25.1122	04.25.1123	-
1600 mm	04.25.1162	04.25.1163	04.25.1165
1800 mm	04.25.1182	04.25.1183	04.25.1185
2000 mm	04.25.1202	04.25.1203	04.25.1205

For foldaway tables

Experiment frames			
Width of table	1 row	2 rows	3 rows
1200 mm	04.25.2121	04.25.2122	04.25.2123
1600 mm	04.25.2161	04.25.2162	04.25.2163
1800 mm	04.25.2181	04.25.2182	04.25.2183
2000 mm	04.25.2201	04.25.2202	04.25.2203

for basic tables with pentagonal / octagonal attachments
(to be plugged in Delrin bushings)

Experiment frames		
Width of table	1 row	2 rows
1200 mm	04.25.3121	04.25.3122
1600 mm	04.25.3161	04.25.3162
1800 mm	04.25.3181	04.25.3182
2000 mm	04.25.3201	04.25.3202

Displaceable and variable experiment frames

Guide unit, placed on ball bearings

consisting of two guide rails inclusive guide blocks (high-quality ball bearing guide). The experiment frame is installed in the guide unit, leaving free space in the lower part. The design is so chosen that the complete block with the frame can be removed to the front. Due to the mechanical coupling of the guide unit with the experiment frame, complete tests built-up in the frame, can be pushed back to the end of the table.

Depth of table	Guide unit per table
800mm	04.25.6001
900mm	04.25.6002
1000mm	04.25.6003

Experiment frames

Width of table	1 row	2 rows	3 rows
1200 mm	04.25.7121	04.25.7122	04.25.7123
1600 mm	04.25.7161	04.25.7162	04.25.7163
1800 mm	04.25.7181	04.25.7182	04.25.7183
2000 mm	04.25.7201	04.25.7202	04.25.7203

Experiment frame with free space in the lower part

Ideally suited for direct assembly works on the guide unit. Due to the free space the frame can be displaced to the rear above the table attachment. The frame can also be used in connection with swivel attachments.

Experiment frames between two aluminium leg profiles

Experiment frames			
Width of table	1 row	2 rows	3 rows
1200 mm	04.25.4121	04.25.4122	04.25.4123
1600 mm	04.25.4161	04.25.4162	04.25.4163
1800 mm	04.25.4181	04.25.4182	04.25.4183
2000 mm	04.25.4201	04.25.4202	04.25.4203

Perforated sheet metal walls

for suspension in experiment frames with 2 rows
inclusive locking button

Size of perforated sheet metal plate	Oval perforation	Rectangular perforation
	14 x 5 mm	10 x 5 mm
670 x 662 mm	04.25.5671	04.25.5672
870 x 662 mm	04.25.5871	04.25.5872
1070 x 662 mm	04.25.5101	04.25.5102
1270 x 662 mm	04.25.5121	04.25.5122
1470 x 662 mm	04.25.5141	04.25.5142

1870 x 662 mm	04.25.5181	04.25.5182

Other sizes available on request.

Fastening kit for perforated sheet metal walls

consisting of:

- 100 special plastic dowels
- 25 Spax screws 3,5 x 12 mm
- 50 Spax screws 3,5 x 20 mm
- 25 Spax screws 3,5 x 30 mm

for oval perforation 14 x 5 mm

Order No. 04.25.5300

for rectangular perforation 10 x 5 mm

Order No. 04.25.5301

Multifunctional classrooms due to innovative ABZ® foldaway tables GS-certified by the German employer's liability insurance association Cologne (tested security)

A professional driving unit allows changing table functions. The attachments on the table of the most different types can be folded down and retracted again at the working place by the teacher's partitioning or by individual keys. A cut-out bar guar-

antees optimal safety. When operating the safety cut-out bar, an immediate thrust reversal is released. In addition a current control is integrated. In case of overload of the upward movement the drive switches off automatically. A multiple safety device

per function element ensures 100 % safety. The entire system is certified by the German employer's liability insurance association and bears the GS label.

Note:

On request, a remote control can be supplied instead of the up/down keys.

The foldaway tables are deliverable in 3 different designs:

1. Foldaway table with 19"/3HE attachment
2. Foldaway table with 19"/6HE attachment
3. Foldaway table with combined attachments of a great variety

Professional partitioning

As a rule, the partitioning is installed in the teacher's table in a 19" bottom cabinet.

Example of a partitioning:

Equipment from top to bottom:

Control module

Up/down keys per trainee's working place

Central locking module

with key-operated switch, room emergency stop key, motor protection switch, FI-safety switch etc.

Individual network release module

Release of the network for each individual trainee working place by means of a motor protection switch, alternatively by means of a line safety switch

Foldaway attachment 3 HE

inclusive 19" device support

Width of table	TE units	Depth of foldaway unit 490 mm
1200 mm	198 TE	04.26.1203
1600 mm	276 TE	04.26.1603
1800 mm	316 TE	04.26.1803
2000 mm	355 TE	04.26.2003

Foldaway attachment 6 HE

inclusive 19" device support

Width of table	TE units	Depth of foldaway unit 490 mm
1200 mm	198 TE	04.26.1206
1600 mm	276 TE	04.26.1606
1800 mm	316 TE	04.26.1806
2000 mm	355 TE	04.26.2006

Combined foldaway attachment

Top left: 1 row experiment frame for installing
DINA 4 experiment plates

Bottom left: 3 HE, inclusive 19" device support

Right: Storage place for monitor and PC, inclusive keyboard holder

Width of table	Inside width top left	TE units bottom left	Depth of foldaway unit 590 mm
1600 mm	744 mm	141 TE	04.26.1607
1800 mm	944 mm	180 TE	04.26.1807
2000 mm	1144 mm	219 TE	04.26.2007

Double foldaway attachment, separately controlable

Left-hand foldaway attachment:

optionally 3 HE or 6 HE, inclusive 19" device support

Right-hand foldaway attachment:

Storage place for flat screen inclusive keyboard holder

In addition 1 PC bottom cabinet inclusive front door

Security function:

A modern multi-processor

switching guarantees a maximum of security. Processors of reciprocal control monitor permanently the power consumption and the integrated safety cut-out bar.

Width of table	TE units	Foldaway attachment left-hand	Depth of foldaway unit 490 mm
1600 mm	139 TE	3 HE	04.26.1638
		6 HE	04.26.1668
1800 mm	178 TE	3 HE	04.26.1838
		6 HE	04.26.1868
2000 mm	218 TE	3 HE	04.26.2038
		6 HE	04.26.2068

Multi-functional classrooms due to tables with integrated swivel attachments

The energy swivel attachment

The working places are frequently equipped with small power supplies and different types of measuring technique. Small energy attachments are sufficient in this case. A special feature of the energy swivel attachment is the low overall depth and it has been designed for using the insert board programme acto.

When retracted the devices disappear completely in the work top.

The 19"/3 HE swivel attachment

This attachment has been designed for integrating 19" full racks and partial racks in a swivel attachment. All current 3 HE devices of the series basic and highlab are, therefore, useable also with the swivel attachment technique.

The swivel attachments are available of manual or motorised design as well as in two different models:

1. ABZ tables with energy swivel attachment for the insert board programme acto.
2. ABZ tables with 19"/3 HE swivel attachment for 19" partial and full racks of the equipment programme highlab and basic.

Manual design

With the manual design the attachment can be folded upward by a spring and can be closed again by pressing it downward.

A central release at the teacher's place unlocks the swivel attachments.

Motorised design with security function

A microprocessor controlled drive swings the attachment into position without jerks and noise. The double sealing lip at the front of the attachment and the security function guarantee a high safety. The security function monitors the continuous current consumption. In case of excess current the upward movement is immediately stopped and with the downward movement the thrust is reversed. Due to integrated interfaces the swivel attachments can be controlled individually and can be interlinked.

Swivel attachment 700 mm or 900 mm long

Optionally for installing 3 HE devices inclusive 19" device support or for energy insert boards actio. These swivel attachments are available of manual and motorised design.

Size of table	Width of swivel attachment	TE units	For installation of	Manual design	Motorised design
1600 x 800 x 780 mm	700 mm	126 TE	3 HE devices	04.27.1671	04.27.1673
			Insert boards actio	04.27.1672	04.27.1674

The octagon and pentagon attachments of 19“/3 HE technique

The octagon attachment of 19“ technique for training in groups and for team works resp. is so designed that each trainee can use the device configuration which was meant for him. The entire medium guidance can invisibly be inserted in the attachment by means of cable channels from the bottom. On request, the medium supply can be made centrally from the ceiling by means of aluminium system profiles which are extended to the top.

The octagon attachment of 19“/3 HE technique

The medium can invisibly be inserted in the attachment from the floor by means of the central ABZ leg system profile. Octagon attachment 3 HE

1296 x 1296 x 227 mm

Order No. 04.28.800

The octagon attachment inclusive 4-chamber aluminium leg system profile

The medium can invisibly be inserted in the attachment from the ceiling by means of a large-volume 4-chamber aluminium leg system profile. The scope of supply includes in addition: 4-chamber aluminium leg system profile up to a ceiling height of 3,5 m (depending on the ceiling height) inclusive fastening and assembly material for connection to the ceiling. Octagon attachment 3 HE inclusive 4-chamber aluminium leg system profile.

1296 x 1296 x 227 mm

Order No. 04.28.801

This attachment offers sufficient space for the standard device configuration of a training place. Due to the modular design also individual tables can be set up in a workshop. The pentagon attachment has also been planned for wall mounted working places. These attachments offer for the individual working place the advantages of the octagon attachment. The entire depth of the table can be used by approx. 2/3 of the width of the table inspite of the integration of devices.

Order No. 04.28.500

19" Device rack

inclusive 19" device support

Device support	Width of rack	Order No.

5 x 3 HE/ 84 TE	470 mm	04.29.004
5 x 3 HE/ 19"	525 mm	04.29.005

Suspended drawer units for a double use

Order No. 04.29.010

- This suspended drawer unit can be fitted in the middle, right or left-hand side underneath the working place.
- Two different locks guarantee the strict assignment of the drawers.
- An additional intermediate board avoids the access to the drawer of another trainee.
- Recommended minimum width of the table: 1800 mm

Suspended drawer units, adjustable in depth

can easily be displaced to the rear by a high-quality guide on ball bearing. This creates sufficient leg-room at the front for an additional person. Recommended minimum width of the table with suspended container units which are adjustable in depth: 900 mm

Additional price per drawer unit

Depth of table	Order No.
900 mm	04.29.020
1000 mm	04.29.021

The cabinet systems varantec®pro and varantec®select

Groupe 1: Basic cabinets

With the GS-certified cabinet systems varantec®pro and varantec®select all possible applications in a company can be materialized.

varantec®pro

The basic programme for highest demands on quality in the fields of application engineering, laboratory and office.

varantec®select

This cabinet programme represents the modern aluminium cabinet system line for highest demands on functionality and aesthetics.

Note:

The detailed technical data of both these cabinet systems are contained in the big coloured catalogue „varantec® - The working place system without compromise“ from page 142 as well as in the detailed order catalogue „varantec® - System components“ from page 116. The cabinets shown therein are only a few selected examples and due to the enormously efficient system components can be combined individually.

varantec®pro basic cabinet

Individual cabinet with drawers of the compact drawer system DIN A4
Partitioning of the drawers according to the catalogue varantec system components Figure: Pattern light-gray, top with postforming edge, bow-type handles made of spring steel.

Size: 430 x 420 x 1000 mm (width x depth x height)

varantec®pro basic cabinet

Double cabinet with wing doors

Figure: Pattern beech, top with basic edge, elegant segment handles, chromium-plated, equipped with 3 shelves, high-quality 270° door armatures requiring a minimum of space

Size: 840 x 600 x 1200 mm (width x depth x height)

varantec®select basic cabinet

Individual cabinet with drawers of the wide-wall drawer system 2

Partitioning of the drawers as per the catalogue varantec system components Figure: Pattern maple, top with nicely shaped postforming edge, elegant segment handles, chromium-plated Size: 1260 x 420 x 1200 mm (width x depth x height)

varantec®pro and varantec®select Group 2: Sideboard system

varantec®pro sideboard with plastic sliding doors

Figure: Pattern light-gray, top with basic edge, bow-type handles light-blue RAL 5012, 1 adjustable shelf, suitable for accommodating 2 rows DIN A4, at the front 2 sliding doors inclusive lock
Size: 1220 x 400 x 780 mm (width x depth x height)

varantec select sideboard with horizontal roller shutters

Figure: Pattern maple, top with nicely shaped postforming edge, elegant segment handle chromium-plated, equipped with 3 shelves, roller shutters silver gray
Size: 860 x 400 x 780 mm (width x depth x height)

varantec®pro combination sideboard with glass sliding doors and a horizontal roller shutter system

Figure: Pattern maple, top with a nicely shaped postforming edge, bow-type handles chromium-plated.
Bottom sideboard:
equipped with 2 shelves, roller shutters silver gray
Size: 1820 x 600 x 1000 mm (width x depth x height)
Top sideboard:
equipped with 4 glass shelves (ESG), at the front glass sliding doors (ESG), 1 central partition wall
Size: 1820 x 400 x 1000 mm (width x depth x height)

varantec®pro and varantec®select Group 3: High-level cabinet system for laboratory and office

This group of cabinets can be equipped with drawers, wing doors and roller shutter systems. The doors are made of high-density fine chip-boards with a structured, anti-dazzle plastic covering or alternatively made of glass (on request, toughened safety glass ESG deliverable). The standard height of the high-level cabinets is 2000 mm. With top cabinets and facings, the high-level cabinets can be extended to the ceiling.

Note:

The illustrated cabinet is part of the aluminium cabinet series varantec®select and its special feature is the additional aluminium system profile adapted to the outside.

1
Basic cabinet with 2 all-over wing doors and 2 aluminium profiles
Size: 1030 x 600 x 2000 mm
(width x depth x height)

2
Row cabinet with wing doors with 4/5 glazing inclusive all-around frame
Size: 1000 x 600 x 2000 mm
(width x depth x height)

3
Row cabinet with glass wing doors with full glazing inclusive all round frame
Size: 1000 x 600 x 2000 mm
(width x depth x height)

4
Row cabinet with glass wing doors with frameless full glazing
Size: 1000 x 600 x 2000 mm
(width x depth x height)

5
Row cabinet with roller shutters and drawers
 Size: 1000 x 600 x 2000 mm
 (width x depth x height)

6
Final row cabinet as open hall cupboard with 2 aluminium profiles
 (On request also with double doors at the front)
 Size: 1020 x 600 x 2000 mm
 (width x depth x height)

7
Top element as basic row cabinet with facing, 2 all-over wing doors and 2 aluminium profiles
 Size: 1030 x 600 x 900 mm
 (width x depth x height)

8
Top element as row cabinet with facing, 2 all-over wing doors
 Size: 1000 x 600 x 900 mm
 (width x depth x height)

9
Top element as final row cabinet with facing, 2 all-over wing doors and 2 aluminium profiles
 Size: 1020 x 600 x 900 mm
 (width x depth x height)

a
Aluminium profile at the front

b
Aluminium profile at the back

Note: The interior fittings of the cabinet correspond to the system components of the cabinet programme varantec®pro.

Integration of monitors in the working place

Embedded monitors with an integrated glass panel in the work top

Recommended depth of table: 1000 mm

Professional covering underneath the work top. The angle of vision is adjustable by a flexible support. High-quality, non-reflecting safety glass.

Design	Screen diagonal	Additional price per cutout/Order No.
Embedded monitor	17 Zoll	04.99.0001
	19 Zoll	04.99.0002
Embedded flat screen Monitor	17 Zoll	04.99.0003
	19 Zoll	04.99.0004

Swivel arm

Order No. 04.99.0005

- steplessly adjustable in height (gas spring supported)
- carrying power 5-20 kg
- with integrated keyboard support (withdrawable and lowerable) and rest for the ball of the thumb
- maximum depth of keyboard 255 mm
- cable insert system with torsion protection
- colour light-gray RAL 7035
- monitor support size (width x depth) 400 x 400 mm with cable feedthrough box, size (width x depth) 40 x 80 mm
- swivel length 790-980 mm (from basic axle to front edge of keyboard support)
- for direct plugging in the universal adapter

Monitor stage

Order No. 04.99.0006

- at the top, for placing on the monitor
- at the bottom, for keeping the keyboard
- sizes (width x depth x height)
585 x 360 x 80 mm (outside)
543 x 360 x 60 mm (inside)

Withdrawable keyboard support

Order No. 04.99.0007

- withdrawable for installation underneath the work top
- maximum weight of keyboard 6 kg
- colour black
- size (width x depth x height)
600 x 253 x 56 mm (outside)
555 x 250 x 54 mm (inside)

Keyboard clip

Order No. 04.99.0008

- for installation underneath the storage board or cockpit
- withdrawable by 200 mm and lowerable by 120 mm
- colour light-gray RAL 7035
- keyboard support with an integrated rest for the ball of the thumb size (width x depth) 406 x 280 mm
- maximum depth of keyboard 220 mm
- maximum height of keyboard 75 mm

Flat screen swivel arm

- The position of the swivel arm is individually adjustable (high degree of free space)
- suitable for flat screens 14 - 18 inch diagonal (corresponds to a weight of 2,5 - 8,5 kg without leg)
- covered cable guidance within the plastic covering
- The arm is rotating by maximum 360° and slewable to top and bottom by 0° - 90°
- optionally for direct plugging in the universal adapter or lateral clamping to the work top

For direct plugging in the universal adapter:
Order No.: 04.99.0009
For lateral clamping to the work top:
Order No.: 04.99.0010

Extension arm:
Order No.: 04.99.0011
Keyboard support:
Order No.: 04.99.0012

Mouse pad:
Order No.: 04.99.0013

Flat screen holder

Order No.: 04.99.0014

- ideally suited for adaptation to a horizontal aluminium rail
- suitable for flat screens of 14 - 18 inch diagonal (2,5 to 8,5 kg)
- excellent swivel and rotation range

Horizontal aluminium rail

- for installation between the two rear aluminium leg system profiles
- steplessly adjustable in height, for installation of the above illustrated flat screen holder (Order No. 04.99.014)

Width of table	Order No.
1200 mm	04.99.0015
1600 mm	04.99.0016
1800 mm	04.99.0017
2000 mm	04.99.0018

Accessories for the laboratory

Measuring line holder

Order No. 04.99.0020

Anodized aluminium rail, 300 mm long with 21 plastic supporting elements for up to 100 measuring lines, simple fastening to the wall

Triple hose holder

Order No. 04.99.0021

made of shock-proof plastic, simple fastening to the wall

Combined line holder

Order No. 04.99.0022

Consisting of a measuring line holder and a hose holder, fitted on a melamine laminated chipboard, simple fastening to the wall

Measuring line trolley type 1

Equipment:

- basic frame 800 x 500 x 1200 mm (width x depth x height)
- optionally 1500 mm high
- with 4 steering rollers Ø 75 mm, 2 of them fixable
- 2 laboratory cord holder 300 mm long with 21 supporting elements each
- at the front 1 triple hose holder
- at the back 1 storage tray

Order No. 04.99.0023 for 1200 mm height

Order No. 04.99.0024 for 1500 mm height

Measuring line trolley type 2

Equipment:

- basic frame 800 x 500 x 1200 mm (width x depth x height)
- optionally 1500 mm high
- with 4 steering rollers Ø 75 mm, 2 of them fixable
- board with boreholes for suspending 2 x 66 laboratory cords

Order No. 04.99.0025 for 1200 mm height

Order No. 04.99.0026 for 1500 mm height

Soft PVC mats for table tops

available as fixed measurement or by the metre

Order No.

Size:

04.99.0027

600 x 1000 x 2 mm

04.99.0028

By the metre viz. price per metre inclusive costs for cutting.
Maximum width 1,22 m
length of roll 10,00 m

Note:

When ordering please indicate the exact dimensions, for example 0.4.99.0027 with 1,35 m x 1,00 m
(selling price = list price x 1,35)

BNC cable

Cable: RG 58 C/U

Connector: double-sided BNC connector

Order No.	Design
H40.60A	BNC cable 25 cm
H40.60B	BNC cable 50 cm
H40.60C	BNC cable 100 cm

Laboratory cable

Cable: highly flexible silicone line

-50°C to +180° C, resistant against soldering iron

+300° C/10s

Connector: double-sided cascading connector

Socket parts -10°C to +80° C

Constant current: maximum 32 Amp.

Operating voltage: maximum 500 volt

Contact resistance: 0,3 mΩ

Order No.	Design
H40.50A	Laboratory cable 25 cm red
H40.50B	Laboratory cable 25 cm blue
H40.50C	Laboratory cable 25 cm black
H40.50D	Laboratory cable 50 cm red
H40.50E	Laboratory cable 50 cm blue
H40.50F	Laboratory cable 50 cm black
H40.50G	Laboratory cable 100 cm red
H40.50H	Laboratory cable 100 cm blue
H40.50K	Laboratory cable 100 cm black

Testing spike with measuring line

Testing spike: with 4 mm lamellar plug

Cable: highly flexible 0,75 mm, double insulated

Length: 100 cm

Colour: red

Order No. H40.52A

Clamping spike

Clamping spike: with spring hook pair

Connection socket: for safety plug

Operating voltage: max. 1000 V AC/DC

Current: max. 1 A to 40° C

Total length: approx. 190 mm

(without safety plug)

Colour: red

Order No. H40.52B

High-current clamping spike

Clamping spike: with claw gripper

Connection socket: for safety plug

Operating voltage: max. 1000 V

Current: max. 20 A to 40° C

Claw gripping width: max. 20 mm

Total length: approx. 130 mm (without safety plug)

Colour: black

Order No. H40.52C

Safety short-circuit bar

with outputs for safety plugs at the back

Distance of pins: 19 mm

Temperature range: -10° C to +70° C

Constant current: max. 32 A

Order No. H40.58A

A Quadropole pliers (1 pair)

Cable: 70 cm long

Pliers: electrically reciprocally isolated clamping jaws

Opening of pliers: max. 15 mm

Constant current: max. 0,5 A

Plug: 4 safety plugs

Order No. H40.54A

Adapter bushing – red flexible cord

Safety clamping plug for flexible cords

Cord cross section: 0,12 mm² - 2,5 mm²

Order No. H40.56A

Adapter bushing – black flexible cord

Safety clamping plug for flexible cords

Cord cross section: 0,12 mm² - 2,5 mm²

Order No. H40.56B

Adapter shockproof socket

Change-over from shockproof socket connection without protective conductor to 4 mm safety sockets

Order No. H40.56C

EGB Working place equipment

The EGB programme of accessories from erfi leaves nothing to be desired with respect to completion and retrofit. Some system components are required for the equipment of a modern EGB-conform working place. In particular the standards IEC 61340-5-1 and DIN IEC 47 (Sec) 1330 give information about the requirements of ESD working places and ESD protection zones.

Conductive working mats either of fixed dimensions or from a roll

- two-layer, hard-wearing synthetic rubber coating
- solder tin and heat resisting, abrasion-proof, halogen-free, volume conductive, conductive bonding is not required
- thickness of material: 2 mm
- discharge resistance RA as per EN 61340-5-1: $10^6 - 10^7 \Omega$

Order No.	Colour	Dimensions
04.99.0100	grey	From the roll: 1220 mm x 10 m
04.99.0101	grey	with rounded off corners, made with 2 press-studs 10 mm and 1 discharge cable, smooth (1 M Ω)

Width of roll 1.000 mm and pieces cut-to-size on request.

04.99.0102	green	From the roll: 1220 mm x 10 m
04.99.0103	green	with rounded off corners, made with 2 press-studs 10 mm and 1 discharge cable, smooth (1 M Ω)

Width of roll 1.000 mm and pieces cut-to-size on request.

04.99.0104	beige	From the roll: 1220 mm x 10 m
04.99.0105	beige	600 x 1000 mm with rounded off corners, made with 2 press-studs 10 mm and 1 discharge cable, smooth (1 M Ω)

Width of roll 1.000 mm and pieces cut-to-size on request.

04.99.0106	light-blue	From the roll: 1220 mm x 10 m
04.99.0107	light-blue	600 x 1000 mm with rounded off corners, made with 2 press-studs 10 mm and 1 discharge cable, smooth (1 M Ω)

Width of roll 1.000 mm and pieces cut-to-size on request.

Conductive floor mats and working mats resp. of 2,5 mm thickness

- two-colour caoutchouc covering with dotted pattern
- discharge resistance of $RA < 10^6 \Omega$ as per EN 61340-5-1 with a smooth surface
- thickness of material 2,5 mm, hardly inflammable B1 as per DIN 4102, section 1
- floor mat and table mat of the same pattern (dust-gray, alternatively light-gray)
- inclusive 2 press-studs each and 1 discharge cable
- volume conductive, conductive bonding not required

Order No.	Colour	Dimensions	Type
04.99.0110	dust-gray	2000 x 1200 x 2,5mm	floor mat
04.99.0111	dust-gray	1000 x 600 x 2,5mm	table mat
04.99.0112	light-gray	2000 x 1200 x 2,5mm	floor mat
04.99.0113	light-gray	1000 x 600 x 2,5mm	table mat

Solid rubber lattice mat

Mat for repairs and for manufacture/installation. Screws and nuts are caught due to the structure.

Order No.	Size	Conductive
04.99.0150	540 x 380 x 25 mm	no
04.99.0151	540 x 380 x 25 mm	yes
04.99.0152	625 x 375 x 20mm	no
04.99.0153	625 x 375 x 20mm	yes
04.99.0154	700 x 450 x 20mm	no
04.99.0155	700 x 450 x 20mm	yes

Earthing module

with integrated 1 M Ω protective resistor,
shockproof earthing plug for connection to
a shockproof socket,
6 x push-button connection 10 mm
Order No. 04.99.0160

Earthing module

with integrated 1 M Ω protective resistor for
threaded fixing on or under the table,
1 x pin mounting box,
2 x push-button 10 mm
Order No. 04.99.01601

Safety wrist strap

with integrated 1 M Ω protective resistor
with elastic, adjustable special tissue, anti-
allergical. 4 mm push-button connection,
suitable for connection to a spiral cable
04.99.0163
Order No. 04.99.0162

Spiral cable

with integrated 1 M Ω protective resistor
at both sides with 4 mm push-button, for
connection of the working mats with the
safety wrist strap 04.99.0162
Order No. 04.99.0163

Spiral cable

with integrated 1 M Ω protective resistor,
with 4 mm push-button and bush plug, for
connection of the working mats with the
earthing module 04.99.0161
Order No. 04.99.0164

Spiral cable

with integrated 1 M Ω protective resistor,
with 4 mm push-button and 10 mm push-
button, for connection of the working mats
with the earthing module 04.99.0160
Order No. 04.99.0165

*Examples of connection of spiral cables, earthing
modules, working mats and wrist straps.*

Spannfix articulated standing vise

Spannfix articulated standing vise

The clamping vise can be equipped with various components for the required application. It can be fastened to any work table of the series ABZ and varantec® without any problem.

Screw head

Technical data:

Clamping pressure: 150 kp
Clamping width: 70 mm
Clamping depth: 38 mm
Width of jaw: 50 mm
Jaws: plastic
Weight: 0,60 kg
Order No. 04.99.0200

Board holder

Fixable clamping width, any extension possible at any time, work-appropriate clamping by adjusting the central position, contact-proof support, tight clamping fit of printed circuit boards by a built-in spring system.

Order No. 04.99.0201

Covering plate for tipped frames

For the use with 04.99.0201. Covered with 20 mm foam material. Components of different sizes are so pressed-in that soldering is possible after turning. Size: 240 x 130 mm, Weight: 0,28 kg.

Order No. 04.99.0202

Universal clamping plate

Slots for current standardized screws for installing prototypes or for holding for example tuners, line transformers, loudspeakers etc. Weight: 0,10 kg.

Order No. 04.99.0203

Angle adapter

As accessory unit to be used for every working head, allows an even bigger turning circle. Weight: 0,08 kg.

Order No. 04.99.0204

Quick turning device

With a tightly connected angle adapter, allows very quick turning of the board holder with board and cover plate by 180°.

Weight: 0,25 kg.

Order No. 04.99.0205

Spannfix leg with ball joint

With clamp fixing to be screwed to a work table of a maximum thickness of the table top of 80 mm. Weight: 0,95 kg.

Order No. 04.99.0206

Spannfix leg with ball joint

With screw-type console and threaded tenon M 12 x 1,5 for screwing on. Base plate 150 x 105 mm. Weight: 0,80 kg.

Order No. 04.99.0207

Simple example for ordering:

04.99.0206 leg with ball joint

04.99.0204 angle adapter

04.99.0201 board holder

Programme of laboratory chairs Leanos

Swivel chair L101

Low back rest, **permanent contact mechanism**, back rest adjustable in height, basic adjustment of sitting height, height of back rest: 430 mm

Steel foot: black, on request brilliant silver or chromium-plated

Cloth cover: Numbers see page 85

Castors: soft, for hard floors Order index / 0

hard, for soft floors Order index / 1

Example of an order for the illustration opposite:

Order No.: L101 / 0232 / 1

Basic model / cover / type of castors

Model L101 / 0232 Garant blue / hard castors for soft floors

Swivel chair L102

Low back rest, **synchronous mechanism and regulation of weight**, back rest adjustable in height, basic adjustment of sitting height, height of back rest: 430 mm

Steel foot: black, on request brilliant silver or chromium-plated

Cloth cover: Numbers see page 85

Castors: soft, for hard floors Order index / 0

hard, for soft floors Order index / 1

Example of an order for the illustration opposite:

Order No.: L102 / 0232 / 1

Basic model / cover / type of castors

Model L102 / 0232 Garant blue / hard castors for soft floors

Swivel chair L151

High back rest, **permanent contact mechanism**, back rest adjustable in height, basic adjustment of sitting height, **height of back rest: 530 mm**

Steel foot: black, on request brilliant silver or chromium-plated

Cloth cover: Numbers see page 85

Castors: soft, for hard floors Order index / 0

hard, for soft floors Order index / 1

Example of an order for the illustration opposite:

Order No.: L151 / 0232 / 1

Basic model / cover / type of castors

Model L151 / 0232 Garant blue / hard castors for soft floors

Swivel chair L152

High back rest, **permanent contact mechanism**, back rest adjustable in height, basic adjustment of sitting height, **height of back rest: 530 mm**

Steel foot: black, on request brilliant silver or chromium-plated

Cloth cover: Numbers see page 85

Castors: soft, for hard floors Order index / 0

hard, for soft floors Order index / 1

Example of an order for the illustration opposite:

Order No.: L152 / 0232 / 1

Basic model / cover / type of castors

Model L152 / 0232 Garant blue / hard castors for soft floors

Option:
Arm rests (1 pair)
adjustable in width
and height, black,
Order No. L952

Option:
Ring arm rests
(1 pair) black
Order No. L950

Programme of working chairs Sintec for the production

Model Sintec 9810-1000

Contact back rest and adjustment of the seat's inclination, seat and back rest made of shock-proof and break-proof polypropylene. Textile or integral foam upholstery possible. Height of back rest 420 mm. Adjustment of the sitting height from 430 - 580 mm. With abrasion-proof plastic floor gliders.
Order No. 9810-1000

Model Sintec 9803 -1000

same as model 9800-1000, however, with load-dependent braking double-casters for hard floors.
Order No. 9803-1000

Model Sintec 9801-1000

same as model 9800-1000, however, adjustment of sitting height from 580 - 850 mm. With abrasion-proof plastic floor gliders and an all-around climbing assistant.
Order No. 9801-1000

ESD chair

Model 9801E

Contact back rest.
Adjustment of sitting height from 580 - 850 mm. Height of back rest 420 mm. With climbing assistant and gliders.
Order No. 9801E

Model 9800E

same as model 9801E, however, adjustment of sitting height from 530 - 580 mm. With gliders.
Order No. 9800E

Model 9803E

same as model 9801E, however, adjustment of sitting height from 430 - 580 mm. With castors.
Order No. 9803E

Ring arm rest
Order No.
9890-9900

Comfortable arm rest, adjustable in height
Order No.
9353-9900

Model 9865-2001

The integral foam upholstery allows a soft "sitting on an air cushion", is washable and easy to clean. It is resistant against slight acids and lyes. Colour blue.
Order No. 9865-2001

Model 9875

Soft textile upholstery consisting of hard-wearing cloth:
Colours are selectable
black: Order No. 9875-6801
grey: Order No. 9875-6811
blue: Order No. 9875-6802
red: Order No. 9875-6803

Model 9865E/2000

Conductive integral foam upholstery, easy to clean.
Colour: black.

Model 9875E/9801

Conductive textile upholstery, colour: black. Also upholstery 9811, 9802 or 9803 possible, see page 85, cloth cover Duotec MOS antistatic

Swivel Chair, swivel stool, standing assistants

Wooden swivel chair for classrooms

Model 9437-812-234

Adjustment of sitting height by a gas spring from 380 - 510 mm, revolving by 360°, seat and back rest made of multi-laminated beech wood, lacquered, natural-coloured. Sitting width: 415 mm, sitting depth: 390 mm, height of back rest: 280 mm, back rest flexible, five-leg base with plastic gliders, colour brillant silver
Order No. 9437-812-234

with load-dependent, braking, soft safety double castors. (See figure).

Order No. 9437-801-234

Model 9437-801-234

same as model 9437-812,234, however,

Swivel stool

Model 9467-3000

Height adjustment by gas spring with a simple ring release from 460 - 630 mm. Specially large seat, Ø 400 mm, made of multi-laminated beech wood, lacquered, natural-coloured. With abrasion-proof plastic gliders.

Order No. 9467-3000

Model 9468-3000

same as model 9467-3000, however, with load-dependent, braking double-castors for hard floors.

Order No. 9468-3000

Model 9469-3000

same as model 9467-3000, however, height adjustment of seat from 570 - 850 mm.

With abrasion-proof plastic floor gliders and foot ring.

Order No. 9469-3000

Standing assistant

Model 9454-2000

Standing assistant with height adjustment of the seat by a gas spring from 650 - 850 mm. Seat made of integral foam, inclination to the adjustable by 10°. Integrated carrying handle. The seat is revolving by 360°. Solid, extremely flat base plate, Ø 470 mm. Metal parts coated with epoxy resin, anthracite.

Order No. 9454-2000, not conductive

Order No. 9454E-2000, conductive

Standing assistant

Model 9452-2000

Space-saving, foldable compact standing assistant made of precision steel pipe. Height adjustment of the seat from 650 - 850 mm by a grid mechanism. The seat is adjustable in inclination to the front by 10°. Seat made of integral foam with integrated carrying handle. Metal parts coated with epoxy resin, anthracite.

Order No. 9452-2000
